DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to biodetectors, classified in class 424, subclass 93.1.
- II. Claims 19-24, drawn to expression vectors for making a fusion protein, classified in class 435, subclass 320.1.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I and II are directed to different products. Group I is drawn to biodetectors, whereas Group II is drawn to expression vectors for making fusion proteins. While the fusion proteins of Group II can be used in the biodetectors of Group I, the vector and the fusion proteins can be used in other procedures. For example, the vector can be used to produce a protein separate from the biodetector. Moreover, the fusion protein can be used as an immunological composition for the production of antibodies or the detection of antibodies.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1645

Because these inventions are distinct for the reasons given above and the search required for two groups would not be coextensive in scope, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
